

# Internet Accelerator

**NetXL+ is an Internet accelerator service for low speed dial-up, wireless, DSL and cable Internet connections. Powered by Propel's proprietary acceleration technology, the service combines multiple proven acceleration methods to provide more speed and options for your customers.**

NetXL+ employs a variety of technologies to move web pages over the Internet more quickly, all of which require no changes from the customer or Internet Service Provider (ISP). Customers only see improvement using the same ISP, equipment and browser.

## **How does NetXL+ work?**

NetXL+ utilizes proxy servers deployed throughout the Internet backbone in North America, Western Europe, Central and South America and Asia Pacific. The network is redundant and fault-tolerant with automatic geographical load balancing among servers.

The proxy servers and accelerator software use proprietary data compression technology from Propel. Based on public standards this technology is far more effective than the normal compression technology compressing text data up to 50x and images up to 12x.

NetXL+ Internet acceleration service is compatible with all ISPs, including AOL and MSN. All a user needs is Windows® (98, 2000, ME, XP Home or XP Pro/Vista) or an Apple Macintosh (OS X 10.2 or later, or 10.4 Intel Mac) and any browser available on the market, including: Internet Explorer (5.5 or later for Windows and 5.2 for Mac), Opera, Mozilla, Firefox, or Safari 1.2.

### **Subscriber Benefits:**

- Up to 7x acceleration of Web
- Ad Blocker
- Automatic Upgrade
- Best Image Quality and Speed

### **ISP Benefits:**

- One of the fastest services available
- Quick time to Cash / Best Pricing
- Load Balancing (Geographic as well)
- 3rd party applications compatibility
- Hosted

### **Compatibility & Support:**

Anti-Virus Compatibility	Yes
Layered Service Provider (LSP) Compatibility	Yes
General Browsers Support	IE, Opera, Mozilla, Firefox, Safari
Proprietary Browsers Support	MSN, AOL
Email Protocols Supported	POP3, SMTP, IMAP (Windows only)
FTP	Yes
Web Email Spam Protection*	Yes

### **Acceleration:**

Web Acceleration	Higher
Image Quality	Better
Mail Acceleration	Yes
Downloads Acceleration	Yes

### **Features:**

Ad Blocker	Yes
Pop-up Blocker	Yes
Email Acceleration	Yes
Built-in Diagnostics	Yes
Built-in Performance Reporting	Yes
Authentication Methods	Radius

### **Authentication:**

Good Privacy	Yes
